

The first Israeli Druze woman
Dr. Camla Badriya
space and aeronautics engineer

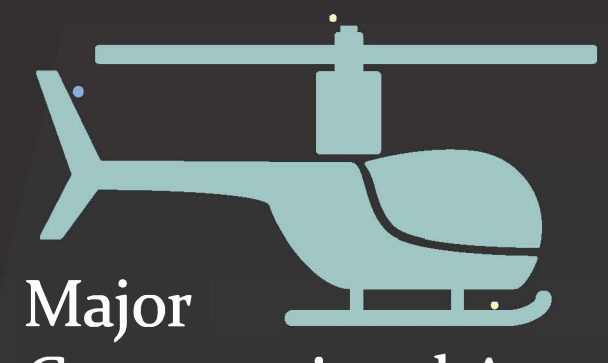

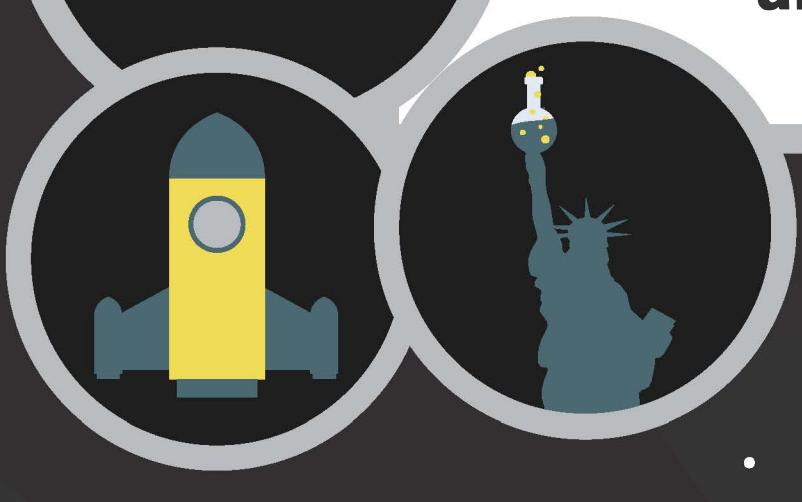

Completed her doctorate degree in aerospace engineering and aeronautics, represented the University of Maryland in several conferences in the United States and received the Emilia Earhart prize.

2017

2016

Got accepted into the University of Maryland in The United States, the university where most of NASA's scientists studied, and completed her master's degree in space engineering.

Major
Computational Aerodynamics
Minor
Helicopters Aerodynamics

Started her studies at the Technion in Haifa, Israel in the field of space and aeronautics engineering.

2002

1982

Was born to a Druze family in the village of Daliat El Carmel. Graduated highschool with Honors. Dr. Badriya's strong interest in aerodynamics and aviation and in solving complex problems has continued to flourish in her postdoctoral studies.
